SUMMARY OF EXAMINER INTERVIEW

The Applicants thank the Examiner for the courtesy of the telephone interview of May 5, 2009. The Applicants would like to summarize the matters discussed during the interview:

Applicants initiated a request for an interview with the Examiner to discuss potential distinctions between the present application and a combination of Hatch (U.S. Patent No. 7,116,994) and Widger et al. (U.S. Patent 7,068,772). Applicants submitted proposals to distinguish the independent claims over Hatch and Widger. The proposals focused on clarifying how mobile-originated messages trigger web based applications. However, no agreement was reached regarding specific amendments that would distinguish the current claims over a combination of Hatch and Widger.

The Applicants and the Examiner discussed additional features that could overcome Hatch and Widger. The Examiner agreed that better defining what the mobile-originated message is for, and how it will be used, would be a good approach to overcoming the current rejections. However, the specific language was not agreed upon, and the Examiner did not promise that amendments directed to these features would be guaranteed to overcome the current rejections. However, the Examiner agreed that if such amendments were made the Examiner would consider these limitations in a subsequent response.

The Applicants submit the above summary for the Examiner's review. The Applicants greatly appreciate the Examiner's ongoing efforts with regard to the present application. If a telephone interview would expedite the prosecution of this application, the Examiner is invited to contact Judith Szepesi at (408) 720-8300.

Respectfully submitted,
BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN LLP

Dated: June 15, 2009
